Summary

Chauncey is a hard worker that scored above 75% after 5 weeks of training to earn a spot at Boeing. Some of his best skills also come from personal learning experience, as well as on the job experience. His strengths are in his adaptability, research skills, decision making, and problem solving. He loves cars (drifters) and he has the opportunity to troubleshoot often in this hobby!

Technical Skills

JavaScript, HTML, CSS, Node, Express, MongoDB, API's, Axios, Navigo, HTTP RESTful API's, VS Code, Markdown, GitHub, UI/UX, Jira, Agile, OOP, SPA's, CRUD Operations, Deploying to Netlify and Heroku

Education

Savvy Coder Full Stack Web Development Boot Camp – 2021
Agile Certification through ICAgile – 2021

Savvy graduates receive a Scrum certification from ICAgile. They have demonstrated their understanding of the Agile/Scrum Methodology by presenting a final Capstone Project that embodies the methodology and project preparation. The students work in Jira, create User Stories, manage tasks and contributions to Sprints in Jira. They work in teams to plan Sprints, hold daily standups to groom the backlog, and participate in weekly Sprint Retrospectives. They work on selected user stories and keep communication flowing to ensure everyone is on the same page for the next increment of work. All project tracking is done in Jira.

Capstone Project

One of my biggest goals is to learn how to obtain great wealth, so for my capstone project, I decided to create an informational website teaching people what wealth is and ways that could help them attain it. The website will allow users to see how growing wealth could benefit them and how its terminology isn't just about money but also health, status, and freedom. I feel like sites that are available that do explain these things either don't explain them well or aren't appealing enough to keep people interested in navigating the site, so I have created a site doing so. I have used technologies such as Javascript, Html5, CSS, and more for this project.

Experience

Boeing.co - F-18 Assembler Aug 2017 – Jun 2021 • I went from working on the forward fuselage all the way to working on the wing, I had to quickly familiarize myself with the process specs and blueprints to keep the line moving in a timely manner.
- Modified/created tools to work in very different situations.
- Worked with many different teams and managers that I also had to adapt to, every team/manager operated their department differently.

Schnucks – Cashier Aug 2015 – Jun 2017 • Communicated with customers on a day-to-day basis, helping them find items and get in and out of the store in a timely manner.
   • Worked around the store not only being a cashier, but sometimes I would stock shelves, help other cashiers bag food, help customers take food to their cars, and bring in carts.
